Creative Crown Moulding

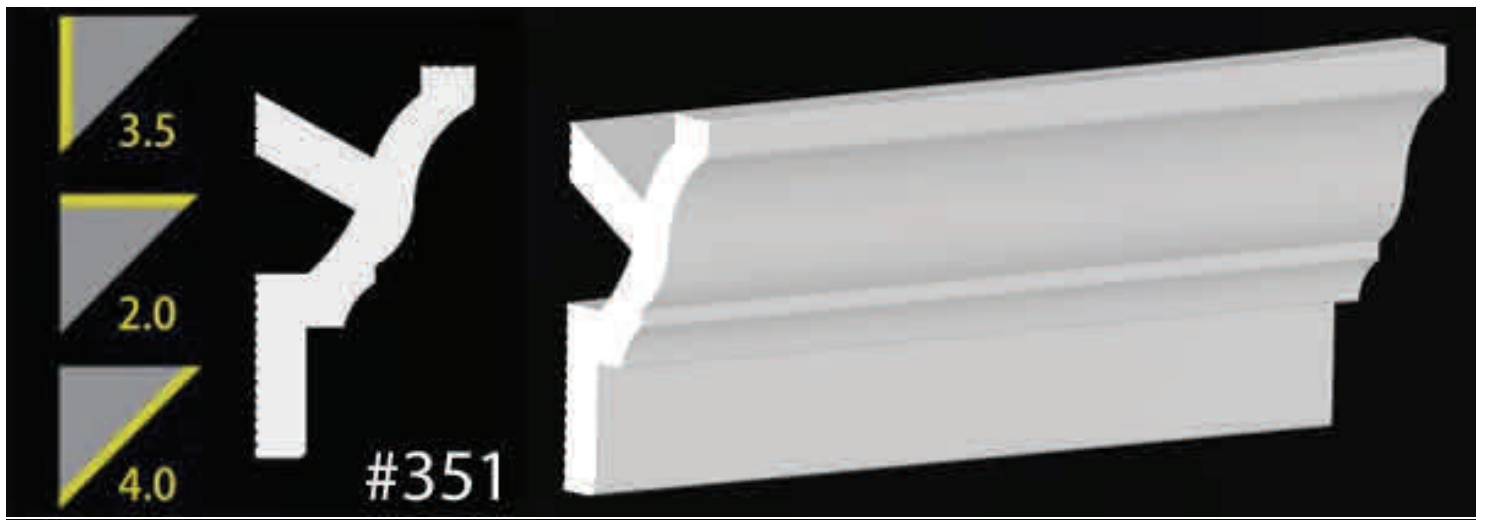

Made from smooth, high density, flat back foam, these crown moldings install with painters caulk and cuts in most positions with most miter saws. So easy to install, even for a beginner.

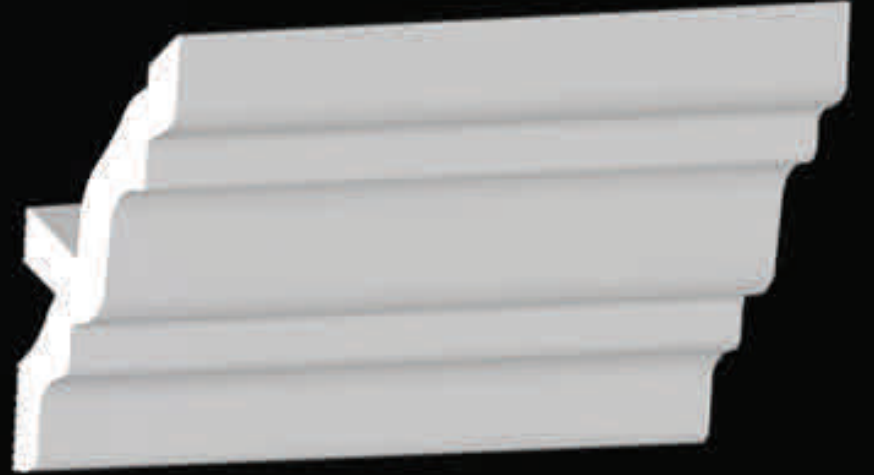

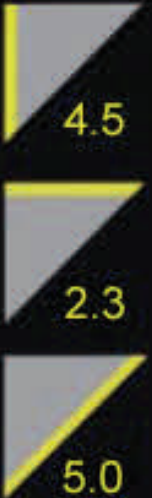

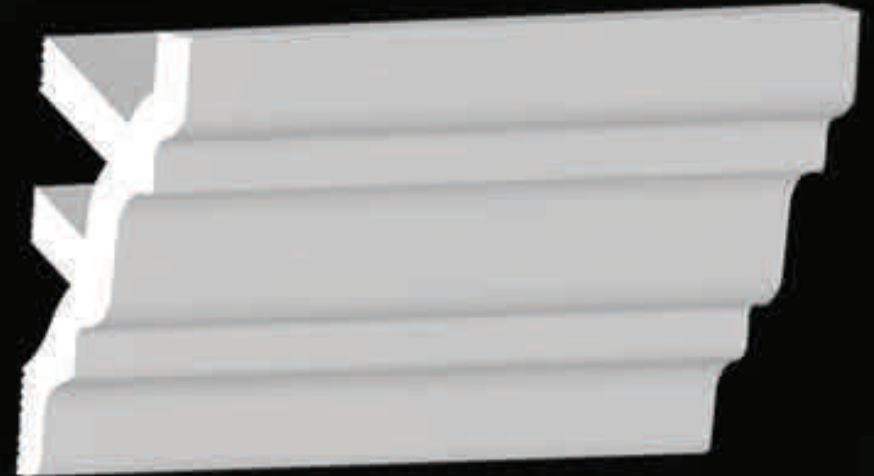

Made in the USA and Class A fire rated, the molding surface requires only one coat of latex paint. A high quality painter's caulk will adhere the molding to most surfaces including painted walls, brick, block, glass, tile, marble, wood, granite, stucco, steel, vinyl, sheet metal aluminum, plastic and concrete.

The open back design is just perfect for covering your wiring. That's what makes it ideal for cove lighting applications. Simply install your LED strips facing upward, run your wires in the channel, power it up and you're brilliantly done.

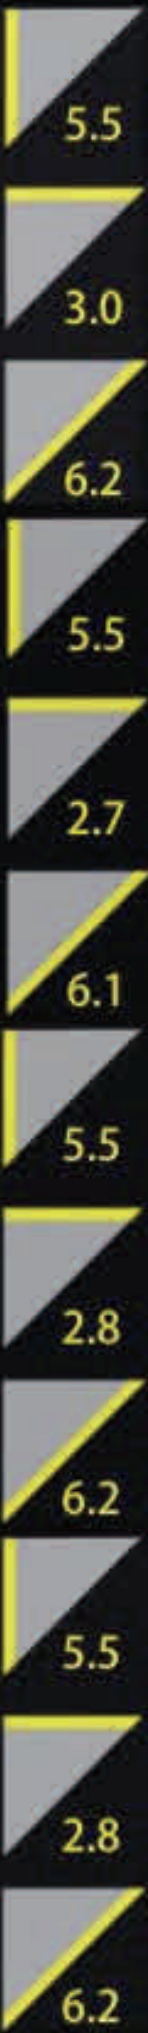

It's economical too! Pricing starts at less than \$2.00 per foot.

Contact us today for more information and a quote on your project.
