

Creative Crown foam crown moldings allow you to install indirect lighting and cables with total ease!

Simply apply two beads of painters caulk horizontally along the back of the molding and press to your wall. Wipe off any excess caulk. You have installed your molding and caulked the seams in one easy step!

Creative Crown foam crown moldings allow you to install wiring where you have limited or no access to attics. You can install your wiring and add a decorative look to your room.

Just install the molding on the wall with our flat-back crown moldings. All you need is two beads of painters caulk.

Now lay in your rope or LED light strips into the channel on top of the molding. No fasteners are needed!

LED strips lights with the room lights off.

LED Strip Lights are available in 5500-6000K cool white and 3000-3300K warm white and two densities: 30 LED per meter or 60 LED per meter. Both types are dimmable.
